READ BEFORE PRINT

- PRINT FISH WITH 5% INFIL TO FLOAT
- PRINT HOOK WITH 100% INFIL TO SINK
- PRINT REEL WITH PETG TO AVOID BREAKAGE
- USE SUPPORTS ON POLE
- USE BRIM ON REEL HANDLE

Reel snap fits into the attachment once on the pole. Be careful because it can break if you push too hard. PLA was not tested on it so i can only recommend PETG for the reel. See last image to see the connection.

Tolerances can be a little tight and might require some play. A touch of glue in the handle kept it on the pole but should stay relatively snug without it.

Tie a string to the pole and to the hook and you're ready to become a master angler.

ENJOY!
