

# Hexagonal Cat Litter Scoop v3

barebone

[VIEW IN BROWSER](#)

updated 1. 3. 2024 | published 1. 3. 2024

## Summary

A sleek litter scoop with hexagonal perforations for easy cleaning, now with threaded connections for added convenience.

This scoop is an upgraded version of my previous litter scoop.

<https://www.printables.com/model/680766-hexagonal-cat-litter-scoop>

Changes from V1/V2:

- Thicker walls
- Holes at the back. Got feedback that sand got stuck at the back.
- Threaded connections instead two pieces that had a snug fit.

There is different length of handles to choose from. If you want longer handle, just print another one and connect them.

As the previously versions there is still no need for support while printing.

To be sure that the handle wont break at the threading, don't be shy with infill and walls OR print it laying down (with support).

Your feedback is highly appreciated as I continue to enhance your cat care experience. Share your thoughts – your input matters!
