Summary

A replacement for your broken 2019-2023 Jeep Cherokee license plate tailgate nuts

[Hobby & Makers](#) > [Automotive](#)

Tags: [nut](#) [licenseplate](#) [retainer](#) [jeepcherokee](#)

If you own a 2019-2023 Jeep Cherokee, you are likely to encounter corroded retainers for your license plate on the tailgate, causing you to remove the entire nut with your plate. This 3D print file provides a solution. This replacement retainer is designed to press directly into the tailgate where the original retainer is broken. You might need minimal filing or de-burring to ensure a good fit. Once in, it'll expand for a secure hold. Simply use an M5 screw (or slightly larger) to fasten your license plate and you're ready to go. This is designed to print with 0.3mm layer height in PETG, with solid infill.
