Summary

simple clean design stand for jewelry, plenty of designs just by lifting the circles / ovals

As I am a goldsmith, I was looking for some design jewelry display for my own made jewelry, which I could have in my workshop. I did not find any cool, so I had to make one for myself. So here it is for you...

These stands are suitable for earrings and necklaces (pendants). Each model consists of two pieces which are easy to join and hold well together, or you can stick them together with a glue (two component epoxy glue works perfectly).

I personally use them without glue, because I like to incline them to one side or the other, when I want, as seen at the pictures, just to break the established rules :-)

Both pieces can be printed without supports, just let the circle / oval lay down and keep the orientation of the base. There are 4 different bases, each one fits best to different radius of the stand, But anyway, the pieces will hold together even you use another radius stand, it is quite tight.

I prefer to print the base in 0,10 or 0,15 layer thickness, because the layers are not so visible “on the wave”. The circle / oval can be printed at the highest possible one.

Hope, you like it! Comment, suggest any improvements :-)

Have a great day, guys!

Marta
