## Assembly:

- You can use any LEDs and glue them into the Stems.  
If you want to have dem fading colors you can use these:  
<https://www.ebay.com/itm/174484670914>
- For power you can use a 220ohm resistor and a 5V power brick.
- Use the pictures to see where to put the different parts.
- the stems get glued into the base
- the mushroom heads clip on top
- optionally you can use 9V batteries with mini led drivers to make it battery powered
- → more at the end of the description!

If there are any questions comment and I will try to help.

## Assembly Steps:

## Assembly Steps:

1.

Print the 6 Mushrooms (2 big 4 small)

2. Print all Stems

3. glue them corresponding to the image

4. insert LEDs & electronics  
you can use this tutorial for wiring:

<https://hellocircuits.com/2013/01/19/simple-led-circuit-with-9v-battery/>

5. optionally print the bottom cover

6. Clip on the heads
