I've had an old boring clock on my wall and wanted to re do it. I saw a clock made out of wood on instagram (nineteen79woodwork) and created something similar. The dials are just glued on the old ones.

Size:

Clock - 170x170x19 mm

Mechanism - 57x57x15 mm

it probably won't fit your mechanism, so I included .STEP files so you can edit the parts to fit your needs.

Enjoy.
