Base Plate for the **Modern Spiral Planter** by [SchulteGeileTechnik](#).

This base plate is designed to fit 3 planters. To allow printing on smaller 3D printers, the design was split into 3 equal sections which snap together. If you have a larger print surface you can also use the full version.

Important

I designed the base plate for the 85% scaled version of the planters. Don't forget to scale it up if you want to print it for larger planters.

I hope you enjoy this model :-)
