Overview

Pikachu keychain! Perfect size for a backpack or a key ring.

Good details allow for MMU printing with great results! Colorized MMU model is included alongside the standard STL.

Additional Hardware

I use [these](#) very affordable keychains for all my small models.

Printing Suggestions

- Supports are needed for the downward-facing arm and each foot
- Brims required for each foot (Bambuslicer added these automatically)
- 25% gyroid infill
- PLA or PETG recommended
