

This facial mask frame is designed for those who don't have enough disposable masks. You could change the air filter inside after use. The frame could be disinfected for repeat use. You could test print and adjust the size to perfectly fit your face.

Please note that this is not designed for medical use.

Model Name: Reusable facial mask frame

Intended use: prevention of aerial droplets for mouth and nose

Components and recommended material:

- **Cover & filter fix piece:** please use non-toxic material.
- **Seal:** 4mm foam or silicone band for improved airtightness and softer skin touch.
- **Replaceable air filter:** any brand is ok. Please make sure it's bigger than the frame for better coverage of your mouth and nose.
- **Elastic band:** any elastic band or rope you could find would be ok.
