Summary

Little shower head to be put on a water tap outlet.

[Household](#) > [Bathroom](#)

Little shower head to be put on a water tap outlet. Spreads out a concentrated stream to a gentle shower. Ideal for children to play in the bathtub.

Connects via the EU typical thread of M24x1mm. So it is compatible with all household watertaps here.

I added a seat for the seal. The seal is optional, in my opinion and can be omitted without much leakage.

Printing recommendations:

Print from PETG or ABS, ASA for heat resistance!

Layer height: 0.12mm because of the fine thread
