If you are looking for a practical and versatile way to organize your desk, you might want to try this 3D-printed all-in-one desk organizer. It has multiple compartments and slots to store your essential tools and gadgets, such as a caliper, scissor, cards/phone, 3 USBs, 3 micro-SD cards, a SIM ejector, and more. You can also fit two small A7 notebooks and over 50 pencils in this organizer.

The best part is that you don't need any support material to print it.

The base size is 200x100mm, and you only need about 225g of filament. The printing time is around 7 hours on a Kobra 2 Pro printer.

This organizer is a great solution for keeping your desk tidy and efficient.

Due to the print size, I recommend using clips to attach the Build plate to the bed, if the one you have is magnetic.

DON'T FORGET THE LIKE BUTTON.
