5. Filament material: PLA
6. Rems use without support!!
7. Speed Rems 60mm/s

The Ford Model A Tudor Sedan, introduced in 1928, marked a significant shift for the Ford Motor Company following the success of the Model T. This four-door sedan boasted several improvements over its predecessor, the Model T. It featured a sleeker design with a more modern appearance, departing from the boxy silhouette of the Model T. The Model A Tudor Sedan also incorporated a more powerful engine, a 3.3-liter inline-four capable of producing around 40 horsepower, providing better performance and speed compared to the Model T. Additionally, it offered better handling and a smoother ride, thanks to advancements in suspension and steering systems. The interior of the Tudor Sedan was more spacious and comfortable, accommodating up to four passengers with ample legroom.

and headroom. Its affordability and reliability made it a popular choice among consumers, further solidifying Ford's reputation as a leading automaker during the early 20th century. Overall, the Ford Model A Tudor Sedan of 1928 represented a significant evolution in automotive design and technology, setting a new standard for mass-produced automobiles.
