

Manual assembly travel guitar with built in Amp and Speaker. Model 16

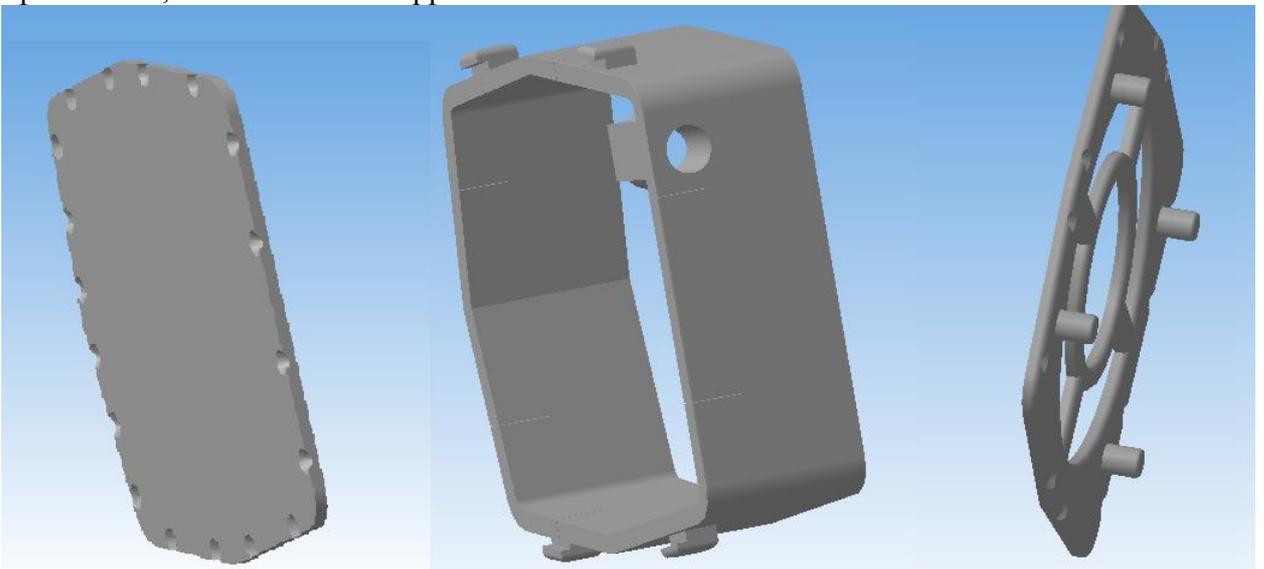

Assembly is very simple.

Print the elements of the guitar. Guitar body. Standing like a pic. PLA infill 15-20%. Use support

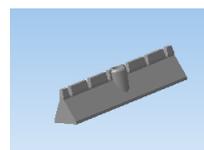

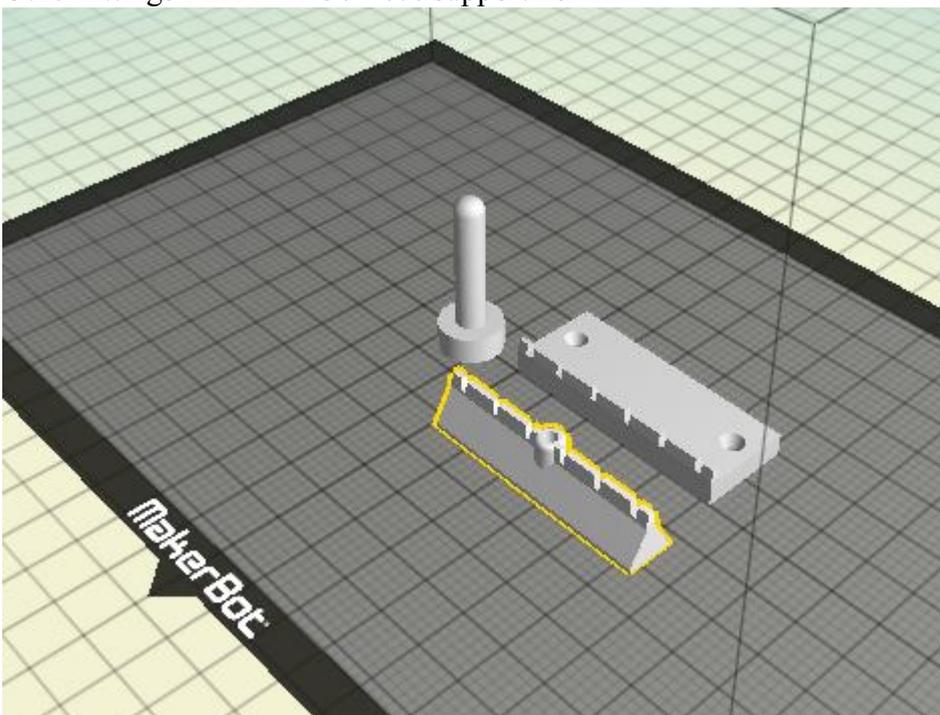

Speaker box, PLA infill 10% support no

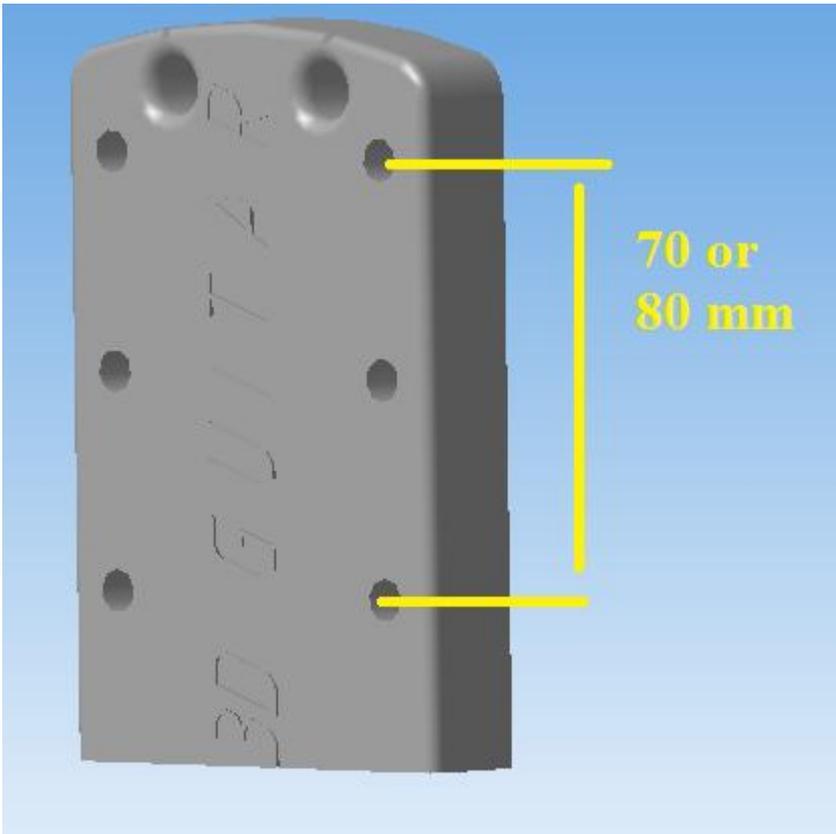

Neck 1 and 2 PLA infill 10% support no

Other fittings PLA infill 30-40% support no

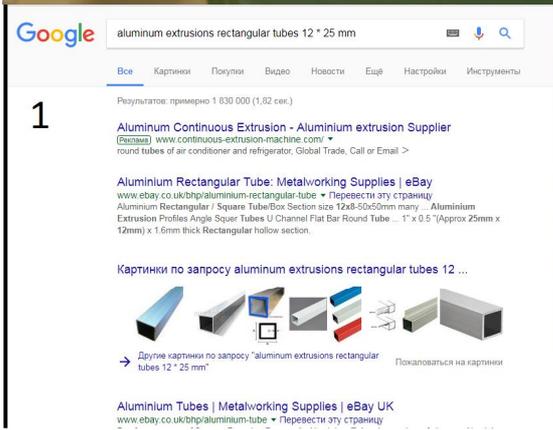

Use a bridge of 8 or 9 mm for your style of play

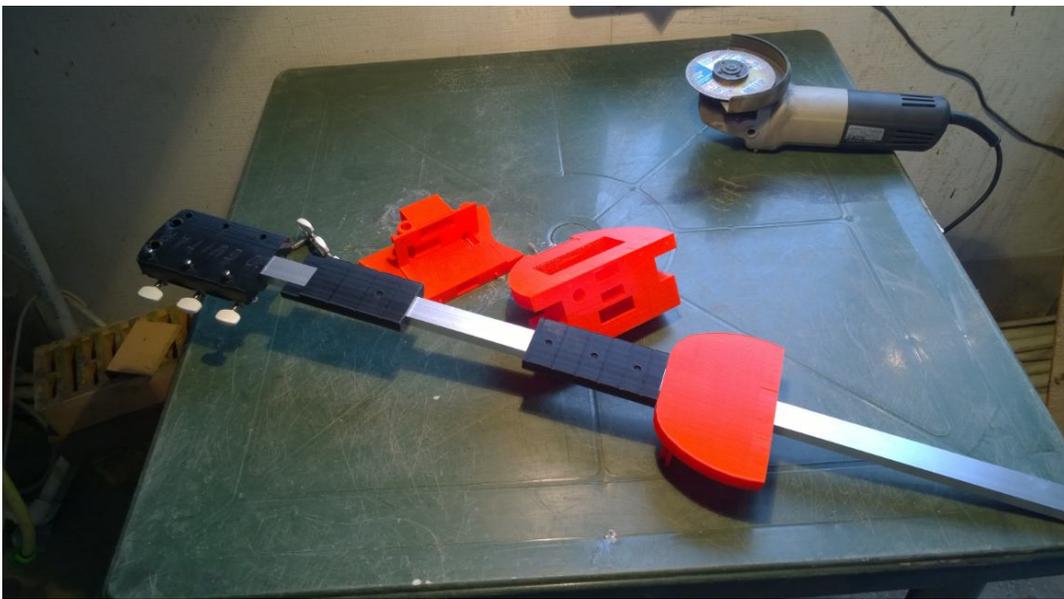

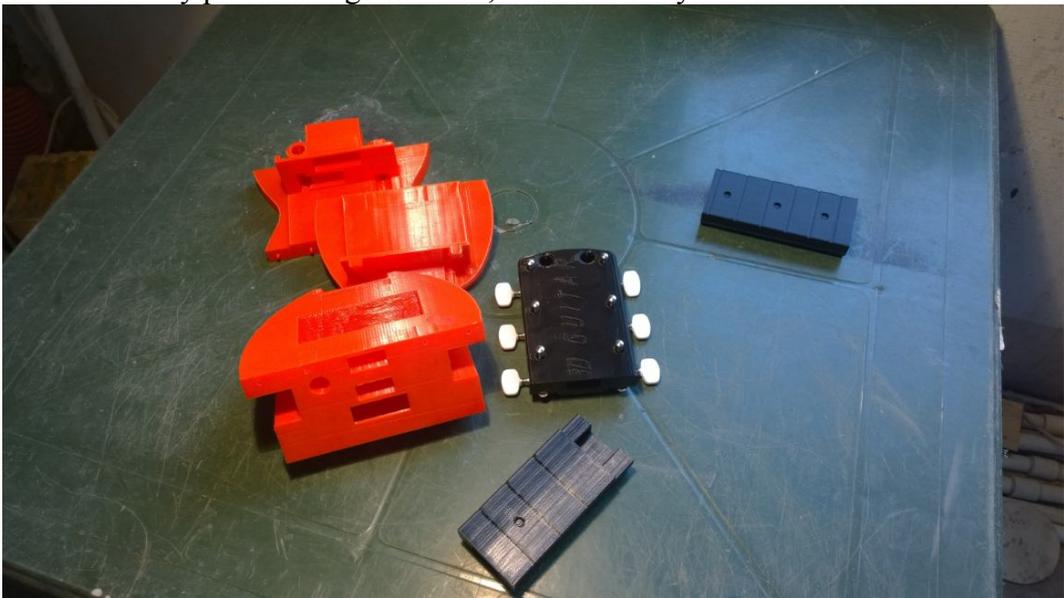

Pegs come in two size 70 or 80mm. Choose file head_70 or head_80 for you pegs type. Or use single pegs.

Then take aluminum extrusions rectangular tubes 12 * 25 mm. You can buy it in any hardware stores. Need 1 meter.

On it assembly part of the guitar neck, head and body.

For more strength, you can connect parts of the body with glue.

Then take a nails 2 * 60mm

Then cut off up to 52mm length

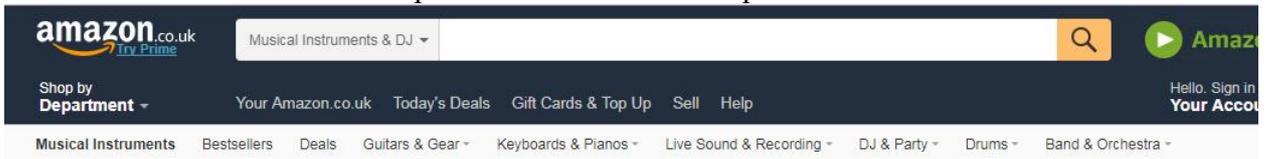

Remove the burrs

Fix nails and colored dots to neck with superglue.

extract the board and speaker from the box

and set to guitar

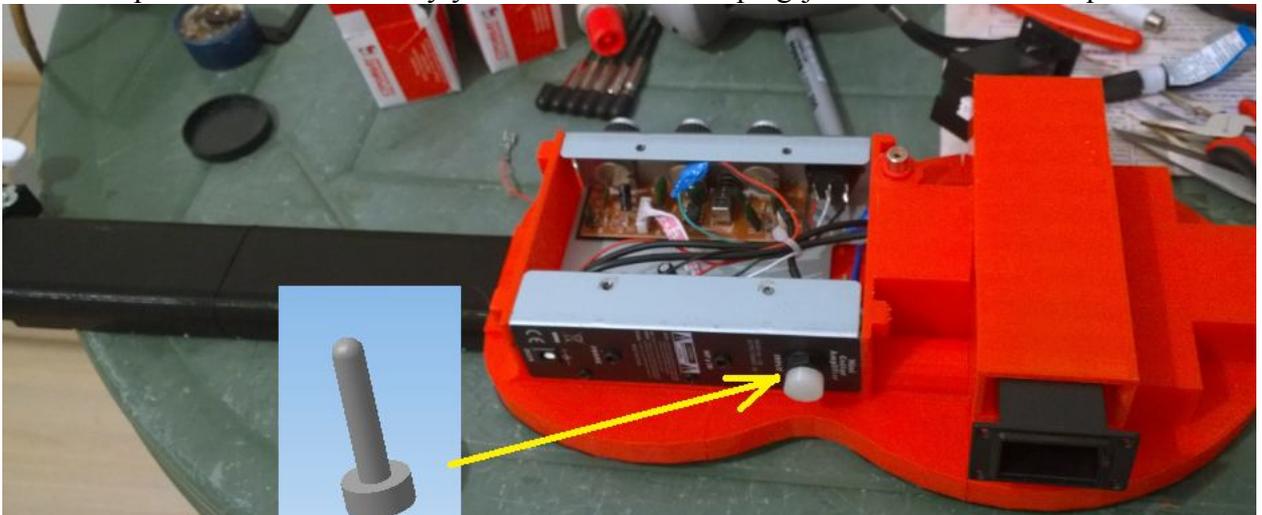

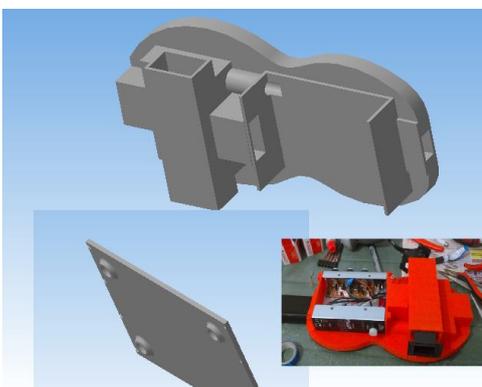

I used a standard humbucker from a Les Paul guitar. Like this.

The screenshot shows an eBay product listing. At the top, the eBay logo is on the left, followed by a search bar containing the text 'Найдите любые товары'. To the right of the search bar are 'Все категории' and a 'Найти' button. Below the search bar, there are social media share icons for Messenger, Facebook, Twitter, and Pinterest. The main heading of the listing is 'Gibson Les Paul Pickups' with a sub-link 'Уточнить результаты'. On the left side, there is a sidebar with 'Связанные с поиском' (Related to search) and a list of items: 'Gibson Les Paul Custom Pickups', 'Gibson Les Paul Pickup Rings', 'Gibson Les Paul Parts', 'Gibson Les Paul Custom', 'Gibson Les Paul Standard', 'Epihone Les Paul Pickups', 'Gibson Les Paul Studio', and 'Gibson Les Paul Pickguard'. The main product image shows two humbucker pickups and a set of screws. The product title is 'Chrome Humbucker Bridge Neck Pickups Set for Gibson Les Paul Electric Guitar US'. The price is '\$10.95' with a 'Купить сейчас' (Buy now) button. Below the price, it says '16 отслеживающих' (16 trackers) and '3 продано' (3 sold). A 'Подробнее' (More details) button is also present. The description states: 'Compatible with GIBSON LP EPIPHONE guitars. The Neck pickup is rated at 8-10K and the Bridge pickup is at 12-16K. 1 Set of Guitar Pickup. These are designed to duplicate that classic warm sound yet the...'. On the right side, there is a table with the following information: 'Состояние: Новый' (Condition: New), 'Осталось времени: 20d 4h 13m' (Time left: 20 days 4 hours 13 minutes), 'Местонахождение товара: Washington' (Item location: Washington), and 'Продано: chuping452 (60★)' (Sold by: chuping452 (60★)).

Wires from the humbucker are soldered to the board, to the input connector for the amplifier to work correctly you need to insert the plug-jack into the socket input.

We use screws 10x2.5 for the final assembly of the speaker box

The speaker can be removed or fixed, like this

This amp model allows you to connect an mp3 player for music accompaniment

I use strings for electric guitar, thickness of 8-38 or 9-42. You can not use thicker strings - guitar can't bend.

Install strings and enjoy.
