## Summary

upper and lower teeth set which fit into each other

[World & Scans](#) > [People](#)

Tags: [scan](#) [teeth](#) [medical](#) [3dscan](#) [dentist](#) [dentures](#)

remodeled teeth inspired by medical scans and moldings made my dentists - Upper and lower part fit into each other like real teeth but each can stand on their own. Size should be accurate to that of an adult.

If u import the file into your slicer it will make it solid when the open side faces the build plate.

0.1 layer height or lower suggested for maximum detail (pictures are in 0.2 since I had no time when printing those).
