Summary

Supporting joints handband design. I used Fiberlogy FIBERFLEX 30D to print it out

[Healthcare](#) > [Medical Tools](#)

Tags: [design](#) [ergonomic](#) [ergonomics](#) [ergonomicdesign](#)

Thin model (2mm height), doesn't require any brim or supports. Using flex filament is crucial for design to work. With small fix (additional elements that would make it more versatile), it could be nice replacement for some medical hand bands, since its more esthetic, durable and light. I recommend printing with 15% gyroidal filling.
